

SYSTEM, METHOD AND ARTICLE OF MANUFACTURE FOR A PRO-ACTIVE MANAGER IN AN INTEGRATED SCHEDULING AND DOCUMENT MANAGEMENT FRAMEWORK

ABSTRACT

A system, method and computer program product are provided for affording a pro-active manager. Initially, a status of a plurality of tasks is determined. Further, information associated with the completion of each of the tasks is identified based on the status thereof. As an option, such information may be required for the completion of each of the tasks. Thereafter, a request is made for the information utilizing a network.
